The Wider Wylde Strategy, 2020-2025

The Wider Wylde Strategy brought together a series of projects and programmes of work which aimed to enhance the health of the River Wylde catchment and increase the resilience of this special chalk stream in the face of our rapidly changing climate.

- 20km landscape scale river restoration project underway www.wyldevalley.org
- 950 local school children and adults learning about the Wylde
- 2km of river habitats enhanced
- Community Conservation Volunteers monitoring River Water Quality and Ecology in the Headwaters

Looking ahead

- Continued focus on the headwaters
- Bringing the Landscape Recovery Project to life - achieve the major funding required to realise the ambition of our stakeholders
